EMPTYING PRESS FOR HIGH VISCOSITY PRODUCTS

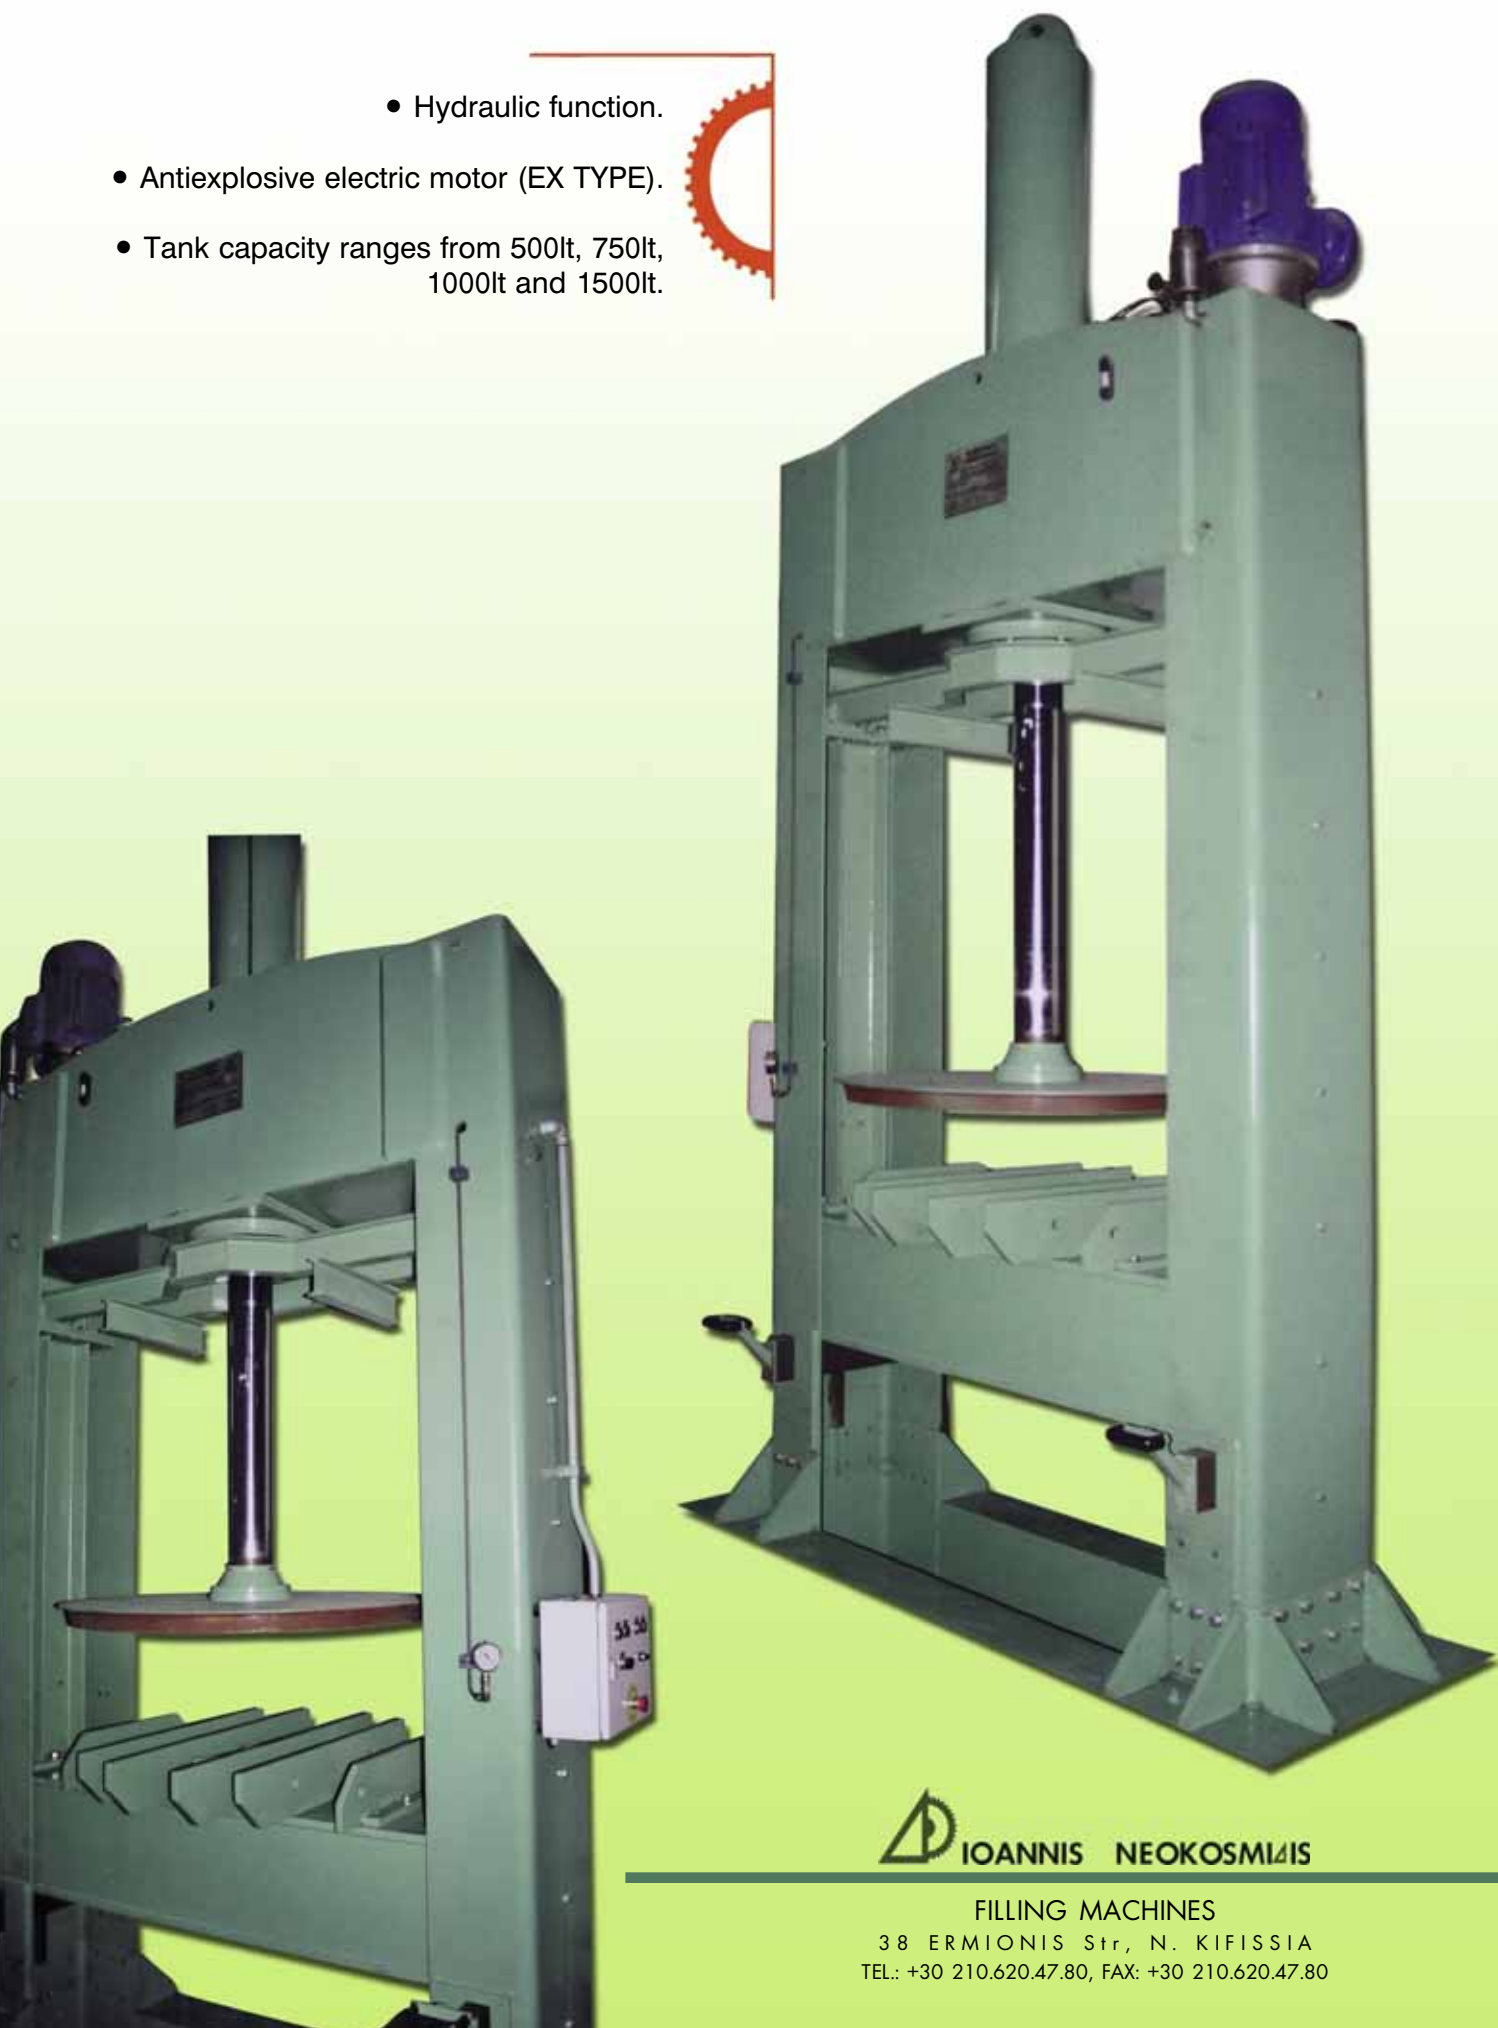

- This is a specialized machine for the packaging process of high viscosity materials. It enables products whose weight and viscosity don't allow them to be transferred easily out of the tank, to be pressed out of it.

- The pressure is controlled electronically from 0 to 300 bar (hydraulics pressure).

- Designed with internal lifting vessel in order to be able to raise the tank in an upper level.

- Hydraulic function.
- Antiexplosive electric motor (EX TYPE).
- Tank capacity ranges from 500lt, 750lt, 1000lt and 1500lt.
